

Virtual Inventory Module (VIM)

Transaction Tracking Outside the Device

VIM Facts:

- VIM is a module available on SupplyLink
- All standard SupplyPort reporting, ordering, business rules and permissions apply
- Standard options available for automated reports and interfaces
- All product characteristics and features available as if item is managed in a machine (loan periods, serialization, allocation codes, kits, etc.)
- VIM storage locations can be assigned by the system or custom named by the administrator
- Manage up to 2,000 items per VIM
- The latest SupplyLink and device software required

SupplyPro Virtual Inventory Module (VIM)

Like the convenience of SupplyPro tracking your materials but still have several items too large to put in a device? No problem with the SupplyPro Virtual Inventory Module (VIM). VIM allows clients with SupplyLinks to track transactions for products not physically within a SupplyPro device. With proper user participation, items are easily tracked with full SupplyPort reporting capabilities and business rules.

How It Works:

- Administrator loads items into SupplyLink
- User logs in and chooses an item(s)
- SupplyLink screen shows users where the item is stored (rack, bin, shelf, closet, etc.)
- Transaction is recorded in SupplyPort
- VIM reports generated on-schedule or on-demand

Typical VIM Items Include:

- Cutting Oil & Fluids
- Metalworking Lubricant
- Refrigerated materials
- Fixtures
- CNC Bar Pullers
- Pre-set CNC Tools
- Pipe & Tube Benders
- Power Hammers
- Motors
- Fans
- Ladders
- Drums
- Wheels
- Forklifts

SupplyPro - Simplicity that Delivers

SupplyPro, Inc. is the premier provider of Point-of-Use (POU) inventory management solutions with over 6,000 installations in 40 countries. Our solutions bring proven simplification to the distribution and management of MROP, safety and tooling supplies at the work cell.
